#### **[Reasons for Non-compliance with the Principles of the Corporate Governance Code]**

The Company fully complies with the Principles of the Corporate Governance Code.

#### **[Disclosure Based on the Principles of the Corporate Governance Code] [Updated]**

[Principle 1.4: Strategic Shareholdings]  
(Policy on Strategic Shareholdings)

In principle, the Company and its subsidiaries (the “Group”) do not invest in listed shares as strategic shareholdings. However, in order to increase the corporate value of the Group, we will invest in listed shares as strategic shareholdings if we can determine that we can obtain benefits such as strengthening and maintaining trust and relationships with business partners and expanding transactions.

(Details of the Verification of Strategic Shareholdings)

When holding listed shares, each year the Board of Directors verifies whether the purpose of holding each strategic shareholding is appropriate and whether the content of the investment has economic rationality and reviews the significance and policy of holding such shares.

(Voting Standards for Strategic Shareholdings)

Regarding the voting rights of the shares held, we will exercise our rights appropriately after judging whether the content of the proposal conforms to the Group's holding policy, whether it will lead to an increase in the corporate value of the investee and the interests of the shareholders, and the interests of the Company's shareholders.

[Principle 1.7: Transactions among Associated Interested Parties]  
(Policy on Transactions among Associated Interested Parties)

When conducting transactions with associated interested parties, etc. based on the Associated Interested Party Transaction Management Regulations, the rationality and appropriateness of the terms of the transaction are deliberated in advance, and it is subject to the approval of the Board of Directors after considering the opinions of outside directors and Audit and Supervisory Board members. In addition, the list of associated interested parties, etc. is created and revised as appropriate after the conclusion of the General Shareholders Meeting and at the end of each fiscal year.

In addition, the results of transactions with associated interested parties approved by the Board of Directors are promptly reported to the Board of Directors.

[Supplementary Principle 2.4.1: Ensuring Diversity]

Since our founding, we remain committed to enriching everyday life and creating a new future where everyone can brighten at any time by providing unprecedented "unique value" to the world. In order to continue to provide "unique value" in the future, we believe that each employee's uniqueness, ability, and growth are essential. In this tough environment of change and competition, we position human resources as the source of value creation and competitive advantage and are promoting "diversity and inclusion."

(Promotion of Women to Managerial Positions)

The Group has introduced systems suitable for work-style reform by applying remote work, flextime system, curbing long working hours, and developing leave and leave systems for childcare and nursing care. We are focusing on creating a work environment where diverse human resources, including women, can play an active role.

As a result of these efforts, in October 2021, we received the "Eruboshi" rating (3 Stars) from the Minister of Health, Labor and Welfare as an excellent company promoting the active participation of women.

Currently, we have one female director and one female executive officer, and the ratio of female officers, including executive officers, is 16.7% as of submission date. In addition, the current ratio of women in all managerial positions is 36.8%, and we will continue to expand opportunities for women to play an active role.

[Ratio of women at the end of July 2024]

Ratio of female employees: 58.9%

Ratio of female managers: 36.8%

On the other hand, because we have expanded our business through mid-career recruitment based on experience, ability, etc. regardless of nationality since our founding, we recognize that we are not in a position to set policies and goals regarding promotion to managerial positions specifically for foreign nationals and mid-career hires.

[Principle 2.6: Exercising Functions as an Asset Owner for Corporate Pensions]

We are not involved in the accumulation of corporate pensions as an asset owner. However, we have introduced a corporate type defined contribution pension plan for full-time employees with the aim of supporting the stable asset building of our employees. For subscribers, we select e-learning content that matches the actual situation based on monitoring reports from investment management institutions and provide continuous investment education. In addition, we will create an environment that facilitates simulation of future life plans by raising awareness through regular information transmission from the investment management institutions so that subscribers can check their own operation status from the individual portal site.

Such advance explanations promote understanding among outside directors and outside Audit and Supervisory Board members, leading to active discussion and full consideration by the Board of Directors. In addition, the Company conducts self-evaluation and analysis of the effectiveness of the Board of Directors with the aim of improving the functions of the Board of Directors and ultimately increasing corporate value. Regarding self-evaluation and analysis, we conducted the following method while obtaining advice from an external organization.

In July 2024, we conducted a survey targeting all directors and Audit and Supervisory Board members who are members of the Board of Directors. Anonymity was ensured by responding directly to an external organization. Based on the aggregate results reported by an external organization, analysis, discussion, and evaluation were conducted at the regular Board of Directors meeting in September 2024. The survey responses confirmed that improvements have been made to the issues identified last year, and the responses were generally positive. We believe that the effectiveness of the Board of Directors as a whole has been ensured. On the other hand, opinions were expressed regarding the content and time allocation of discussions at the Board of Directors meeting and the establishment of an internal control system including subsidiaries, etc., and issues were also raised regarding further improvement of the functions of the Board of Directors and activation of discussions.
